Address Display

Please note, if the is a corporate normalized address (if the address type indicator is set to “N”) then both the normalized address **AND** BDN address fields will be filled in. However the normalized address should be used as this reflects the current information

If the address type indicator is set to “B”, then the BDN format Mailing address will be the only address fields filled in.

Fiduciary

If a co-fiduciary existed the extract will only include the first name listed for fiduciary

Filler

Included extra characters in case of any future expansion to the data fields.
