Appendix 1

Quality Performance Report

This annual report will be submitted to ACF no later than December 31, 2012 and the first submittal will reflect the period October 1, 2011 through September 30, 2012. Lead Agencies will leave this report blank when the Plan is initially submitted.

In this report, Lead Agencies are asked about the State/Territory's progress in meetings its goals as reported in the FY 2012-2013 CCDF Plan, and provide available data on the results of those activities. At a minimum, Lead Agencies are expected to respond to the first question in each section of the Quality Performance Report (QPR) which asks for their progress toward meeting their goal(s) articulated in Part 3 of the CCDF Plan for this Biennium. Because of the flexibility in administering the CCDF program, it is expected that Lead Agencies may not have information and data available to respond to all questions. Lead Agencies may provide narrative updates in the subsequent data sections, including any plans for reporting data in the future, if actual data is not currently available.

The purpose of this annual report is to capture State/Territory progress on improving the quality of child care. Specifically, this report will:

- Provide a national assessment of State's and Territory's progress toward improving the quality of child care, including a focus on program quality and child care workforce quality;
- Track State's and Territory's annual progress toward meeting high quality indicators and benchmarks, including those that they set for themselves in their CCDF Plans and those that are of interest to the U.S. Department of Health and Human Services in measuring CCDF program performance;
- Assist national and State/Territory technical assistance efforts to help States/Territories make strategic use of quality funds; and
- Assist with program accountability and compliance efforts tied to quality investments.

This report collects data in relation to the four components of child care quality used as a quality framework in Part 3 of the Child Care and Development Fund Plan for FY 2012-2013:

- Ensuring health and safety of children through licensing and health and safety standards
- 2. Establishing early learning guidelines
- 3. Creating pathways to excellence for child care programs through program quality improvement activities
- 4. Creating pathways to an effective, well-supported child care workforce through professional development systems and workforce initiatives.

Ensuring the Health and Safety of Children (Component #1)

In this section, Lead Agencies provide information on the minimum health and safety standards and activities in effect over the past year as of September 30, 2012.

A1.1 Progress on Overall Goals

Based on the goals described in the Lead Agency's CCDF Plan at Section 3.1.7, please report your progress using the chart below. You may include any significant areas of progress that that were not anticipated in the Plan, as well. For each goal listed, briefly describe the improvement with specific examples or numeric targets where possible (e.g., revised licensing regulation to include elements related to SIDS prevention, Lowered caseload of licensing staff to 1:50, or increased monitoring visits to twice annually for child care centers). If applicable, describe any barriers to implementing your planned goals.

Note: If your licensing standards changed during this period, please provide a brief summary of the major changes and submit the updated regulations to the National Resource Center for Health and Safety in Child Care (www.nrckids.org.)

A1.2 Key Data

OCC is collecting this information as one part of our overall effort to better understanding State/Territory activities to improve the quality of child care. OCC recognizes that the data requested in this report will only provide part of that picture because there are many factors which affect the data being collected here. Each State/Territory's policy context and priorities and standards will play a role in the way that quality improvement activities are developed and implemented. For example, the number of programs with licensing violations will be affected by how stringent the licensing standards are. States with more stringent standards may be more likely to report more violations than those with less stringent licensing standards. OCC intends to work with the States/Territories to gather any additional contextual information necessary in order to fully understand the context of these data for any reporting activities involving this information.
