

*LIHEAP Report to Congress for Fiscal Year 2021: **Part III. Household Data***
Supplemental Tables: Average Household Benefits with Detailed Footnotes

Table III-4. Estimated Average and Range of LIHEAP Fuel Assistance Benefit Levels, by Type of LIHEAP Assistance, FY 2021ⁱ

Type of Assistance	Average Household Benefit	Benefit Range from Regular Block Grant	Benefit Range from CARES Allocation ⁱⁱ	Benefit Range from ARP Act Allocation ⁱⁱⁱ
Heating ^{iv}	\$645	\$128-\$1,672	\$68-\$1,557	\$171-\$778
Cooling	737	\$200-\$1,504	\$121-\$430	\$253-\$758
Winter crisis	641	\$234-\$1,391	\$238-\$1,391	\$456-\$900
Year-round crisis	1,032	\$295-\$2,022	\$235-\$1,968	\$529-\$1,429
Summer crisis	699	\$263-\$774	\$363	\$263-\$666

ⁱ The data in this table are current as of August 19, 2022. States were not asked to estimate household average benefits for weatherization assistance because estimates would not be comparable to estimated household average benefits for other types of LIHEAP assistance due to the relatively larger role of labor and other support costs involved in weatherization and wide variations in how states define low-cost weatherization. In addition, state-reported household average benefits are not comparable to calculations of the amount of obligated funds per household due to states obligating funds in 1 federal fiscal year but expending them in the next federal fiscal year.

ⁱⁱ State-reported household average benefit amounts from LIHEAP Supplemental CARES Act funds may reflect actual benefits during FY 2021 and anticipated average benefits as states prepared to expend these funds during subsequent fiscal years.

ⁱⁱⁱ State-reported household average benefit amounts from LIHEAP Supplemental ARP funds may reflect actual benefits during FY 2021 and anticipated average benefits as states prepared to expend these funds during subsequent fiscal years.

^{iv} Average household benefits do not include funds used for nominal SNAP heating assistance as grant recipients were required to break out obligations and households assisted with nominal LIHEAP benefits for FY 2021.

ⁱ Household average benefits were gathered from state estimates reported on the *LIHEAP Performance Data Form for FY 2021 - Grantee Survey*, as described in Appendix A of this report. The data in this table are current as of August 19, 2022. States were not asked to estimate household average benefits for weatherization assistance because estimates would not be comparable to estimated household average benefits for other types of LIHEAP assistance due to the relatively larger role of labor and other support costs involved in weatherization and wide variations in how states define low-cost weatherization. In addition, average benefits are not comparable to calculations of the amount of obligated funds per household due to states obligating funds in 1 federal fiscal year but expending them in the next federal fiscal year.

ⁱⁱ Average benefits do not include funds used to provide nominal benefits to SNAP households or households assisted with these benefits as grant recipients were required to break out these obligations and households for FY 2021.

ⁱⁱⁱ A designation of "--" is reported under cooling assistance for states where combined heating and cooling assistance was provided (Nevada) or energy assistance was provided with no differentiation made between heating and cooling assistance (Hawaii). These states reported such funds under heating assistance.

^{iv} A designation of "--" indicates for winter crisis assistance that these states did not provide a separate count because they provided households in winter crises with expedited heating assistance (Massachusetts and New Hampshire).

^v The following states provided emergency heating/cooling repairs or replacements to households as part of their energy crisis benefits. The average household benefits are as follows: California (\$3,033), Colorado (\$2,198), District of Columbia (\$33,328), Idaho (\$157), Illinois (\$2,474), Indiana (\$3,426), Iowa (not specified), Maine (\$206), Michigan (not specified), Minnesota (\$1,357), Mississippi (not specified), Missouri ([Emergency Furnace Repair and Replacement – \$379] and [Air Conditioner Purchase – \$367]), Montana (\$2,077), New Jersey (not specified), New York (\$2,352), North Dakota (not specified), Ohio ([Emergency Furnace Repair and Replacement – \$242] and [Air Conditioner Purchase – \$257]), Oregon ([furnace repair/replacement - \$3,071] and [air conditioner repair/replacement - \$2,931]), Pennsylvania (\$3,500), Rhode Island (\$2,950), South Dakota (\$2,025), Texas (not specified), Utah (\$1,613), Vermont ([furnace repair/replacement – \$1,728] and [tank replacement – \$1,587]),

*LIHEAP Report to Congress for Fiscal Year 2021: **Part III. Household Data***
Supplemental Tables: Average Household Benefits with Detailed Footnotes

Virginia (not specified), West Virginia (\$462), Wisconsin (\$2,399), and Wyoming ([furnace repair/replacement – \$3,773] and [operational furnace replacement to prevent heat loss emergency – \$6,667]).

^{vi} California's average household benefits exclude an average benefit of \$2,048 for households that received service through the state's Severe Weather Energy Assistance and Transportation (SWEATS) program, part of California's other crisis assistance.

^{vii} Connecticut's values exclude an average of \$427 for households that received Safety Net Benefits as part of Connecticut's other crisis assistance.

^{viii} Delaware's average household benefits exclude an average benefit of \$201 for households that received a crisis epidemics assistance benefit, \$425 for households that received an additional crisis epidemics benefit, and \$343 for households that received a third crisis epidemics benefit as part of Delaware's other crisis assistance.

^{ix} Nebraska's values exclude an average benefit of \$312 for deposit assistance as part of Nebraska's other crisis assistance.

^x Nevada's values exclude an average benefit of \$738 as part of Nevada's other crisis assistance.

^{xi} North Dakota reported 295 households under cooling assistance that were assisted with non-crisis cooling equipment repair and replacement services using funding obligated to emergency cooling equipment repair and replacement. Since cooling assistance funds were not used, the average benefit amount for cooling assistance is reported as \$0.

^{xii} South Carolina's values exclude an average benefit of \$529 for households that received window air conditioners or heaters as part of South Carolina's other crisis assistance.

^{xiii} Washington's values exclude average benefits of \$520 for Other Emergency Services (OES) including Emergency Furnace Repair and Replacement, Temporary Shelter Assistance program and for other emergency services.

^{xiv} Wisconsin's year-round crisis average household benefit excludes the average benefit (not specified) for households that received assistance through the Keep WI Warm Fund.
