ⁱ These data are derived from the *LIHEAP Household Report for FY 2016*. These data are current as of May 31, 2017. National percentages are calculated for those states which reported complete data, by type of LIHEAP assistance. Table A-1 in Appendix A indicates the percentages of assisted households for which uniform data are provided. Uniform data on households classified by intervals of the 2015 HHS Poverty Guidelines (HHSPG) was 100 percent for all types of assistance (heating, cooling, winter crisis, year-round crisis, summer crisis, and weatherization assistance). Percent distributions may not add up to 100 percent across income levels due to rounding.

ⁱⁱ Poverty percentages are computed using gross household incomes adjusted by household size. However, there are states that use net household income in determining income eligibility. For those states, the distribution of poverty percentages could be skewed towards the higher end of the poverty level.

ⁱⁱⁱ One state (Pennsylvania) was unable to provide income data for a total of 213 households that received heating assistance.

^{iv} Two states (Pennsylvania and Vermont) were unable to provide income data for a total of 151 households that received winter crisis assistance.
