Supplemental Tables: Assisted Households by Poverty Level

Table III-7. Percent of Assisted Households, Classified by 2017 HHS Poverty Guideline Intervals, by Type of LIHEAP Assistance, Nationally, FY 2018ⁱ

Over 150%	8.2	2.0	7.4	5.8	1.4	25.7

ⁱ These data are derived from the *LIHEAP Household Report for FY 2018*. These data are current as of August 31, 2019. National percentages are calculated for those states that reported complete data, by type of LIHEAP assistance. Table A-1 in Appendix A indicates the percentages of assisted households for which uniform data are provided. Uniform data on households classified by intervals of the 2017 HHS Poverty Guidelines (HHSPG) was 99.9 percent for heating assistance, 98.6 percent for year-round crisis assistance, and 100 percent for cooling, winter crisis, summer crisis, and weatherization assistance. Percent distributions may not add up to 100 percent across income levels due to rounding.

ⁱⁱ Poverty percentages are computed using gross household incomes adjusted by household size. However, there are states that use net household income in determining income-eligibility. For those states, the distribution of poverty percentages could be skewed towards the higher end of the poverty level.

ⁱⁱⁱ Two states (District of Columbia, North Carolina) were unable to provide income data for a total of 341 households that received heating assistance. As a result, percentages of households receiving heating assistance by 2017 HHSPG add up to less than 100 percent.

^{iv} One state (North Carolina) was unable to provide income data for a total of 5,992 households that received year-round crisis assistance. As a result, percentages of households receiving year-round crisis assistance by 2017 HHSPG add up to less than 100%.
