Supplemental Tables: Assisted Households by Poverty Level

Table III-7. Percent of Assisted Households, Classified by 2020 HHS Poverty Guideline Intervals, by Type of LIHEAP Assistance, Nationally, FY 2021ⁱ

Over 150%	9.5	3.9	9.1	8.4	2.3	28.1

ⁱ These data are derived from the *LIHEAP Household Report for FY 2021*. These data are current as of August 19, 2022. National percentages are calculated for those states that reported complete data, by type of LIHEAP assistance. Table A-1 in Appendix A indicates the percentages of assisted households for which uniform data are provided. Uniform data on households classified by intervals of the 2020 HHS Poverty Guidelines (HHSPG) was 100 percent for heating, cooling, winter crisis, year-round crisis, and summer crisis assistance. Uniform data was 99.8 percent for weatherization assistance. Percent distributions may not add up to 100 percent across income levels due to rounding.

ⁱⁱ Poverty percentages are computed using gross household incomes adjusted by household size. However, there are states that use net household income in determining income eligibility. For those states, the distribution of poverty percentages could be skewed towards the higher end of the poverty level.

ⁱⁱⁱ 2 states (Indiana and Rhode Island) were unable to provide income data for a total of 114 households that received weatherization assistance.
