1 Purpose

The Insurance Match (IM) Implementation Guide gives insurers (or their agents), self-insured employers, third-party administrators (TPAs), and state workers' compensation agencies (WCs) information about participating in the federal Office of Child Support Enforcement (OCSE) IM program. Information includes program background, benefits of participating, and participation options.

2 Background

The Deficit Reduction Act of 2005 authorizes us to compare information on individuals owing past-due child support with information maintained by insurers (or their agents) pertaining to insurance claims, settlements, awards, and payments.

This legislation also provides a non-liability clause for participants, as specified in U.S. Code:

42 U.S. Code 652 – Duties of Secretary

(m) Comparisons With Insurance Information

- (1) In General The Secretary, through the Federal Parent Locator Service, may—
 - (A) compare information concerning individuals owing past-due support with information maintained by insurers (or their agents) concerning insurance claims, settlements, awards, and payments; and
 - (B) furnish information resulting from the data matches to the State agencies responsible for collecting child support from the individuals.

(2) Liability

An insurer (including any agent of an insurer) shall not be liable under any Federal or State law to any person for any disclosure provided for under this subsection, or for any other action taken in good faith in accordance with this subsection.

3 Introduction

We developed the IM program to help states and the insurance industry to identify individuals who may receive an insurance settlement, award, or a payment, and who owe past-due child support. The program also helps state child support agencies make claims against an insurance payout.

Participation in the IM program is voluntary for the insurance industry and state child support agencies.

The child support agencies in all 50 states, the District of Columbia, and three U.S. territories (Guam, Puerto Rico, and U.S. Virgin Islands) participate in the program. Many insurance companies, self-insured employers, TPAs, and state WC agencies also participate in the program.

Each state child support agency sends us information on individuals who owe past-due child support. We store this information in the Debtor file and use it to match with individual claimants and beneficiaries that insurers submit. We also send the Debtor file to matching partners to conduct the match.

The IM program is capable of processing many types of insurance claims such as workers' compensation, personal injury, life, annuity, and policy surrenders. A full list of claim types is in Appendix A under Insurance Product Claim Type.

We offer four options to participate in the IM program.

- Claims Submitter – Sends claims to us
- Matching Partner – We send you individuals to match to claims
- Insurance Services Office (ISO) – ISO ClaimSearch® participants
- Debt Inquiry Service (DIS) – Individual look-up or file upload

Participants are required to enter into an operational agreement with us. There are no fees or charges to you.

OCSE sends information resulting from data matches to the state child support agencies responsible for collecting child support. Each state child support agency determines the next step, such as sending a lien, levy, or an income withholding order based on the state's laws and policies.

4 Participation Benefits

Benefits of participating in the IM program include the following:

- Helps children by increasing child support collections through access to monies previously unavailable
- Helps you by reducing the burden of responding to subpoenas
- Helps state WC agencies comply with state requirements

The program also helps you meet state mandates to determine whether a claimant owes child support before making a payout (except the Massachusetts IM program, which ties to other state agency-related IM requirements). You can find state policy information on our [Intergovernmental Reference Guide \(IRG\)](#) website.

To find state policies:

1. Click the state you're researching on the IRG – Policy Profiles and Contacts map.
2. Select **M. Insurance Match** under Program Category.

The electronic submission and transmission of insurance claim data has the following benefits:

- Process is centralized, efficient, and cost effective
- Process provides automatic matching, sorting, and reporting of insurance claims to state child support agencies
- States receive notification about insurance claims more quickly
- Insurers and state agencies experience improved communication
- Transfer is over a secure network protecting personally identifiable information
- Process provides transfer of validated data

5 Participation Options

We support multiple flexible participation options to minimize the impact on your business process and resources.

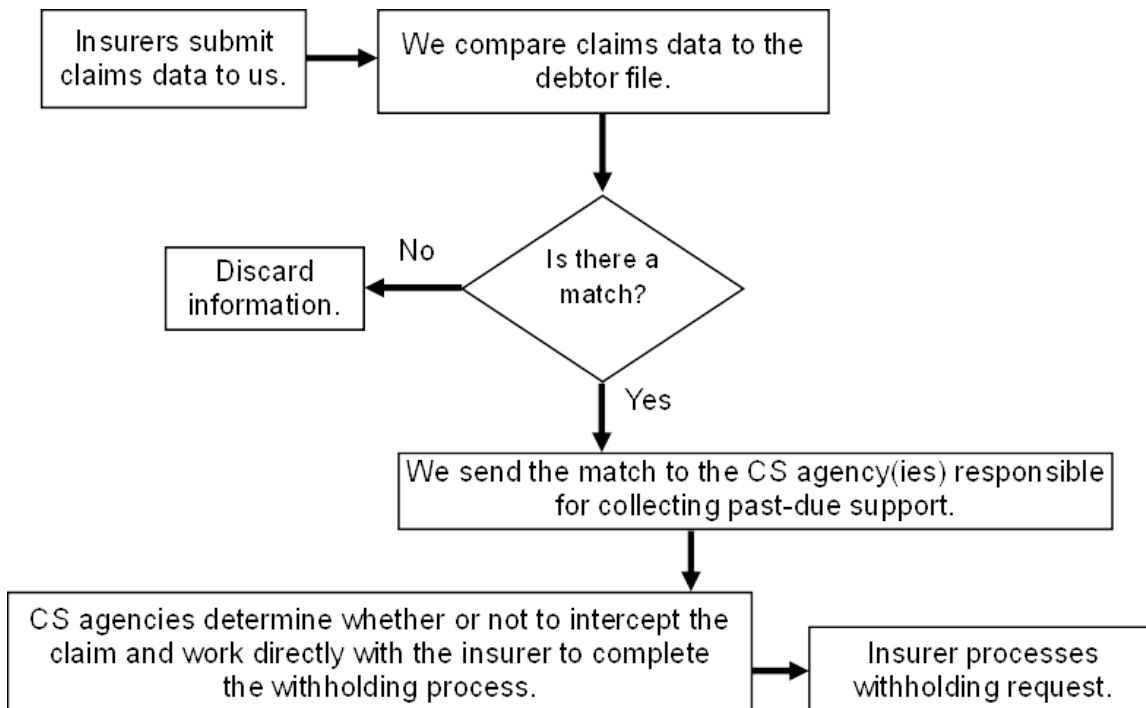

5.1 Participation Option One – Claims Submitter

Claim submitters send us a file with claims information for us to compare individuals to the Debtor file. We forward matched claim information to the state agencies responsible for collecting child support.

You can send files to us on a daily, weekly, biweekly, or monthly basis through the [Child Support Portal \(Portal\)](#), Managed File Transfer (MFT), or Secure File Transfer Protocol (SFTP) with Virtual Private Network (VPN). For child support agencies to receive timely information, you must send files at least monthly.

Figure 5-1 shows the claims submitter process flow. Child support (CS) agencies send information to us about individuals who owe past-due support.

Figure 5-1: Claims Submitter Process Flow

5.2 Participation Option Two – Matching Partner

We send the Debtor file to matching partners. You may designate whether we send you an individual's information for all states or only specific states. You compare individuals against claimants, policyholders, or beneficiaries, and return matches to us. We then forward matches to the state agencies responsible for collecting child support.

We send the Debtor file weekly, monthly, or quarterly, and each record has 300 bytes.

Appendix B of this guide explains the Debtor File layout.

We require strong security and privacy controls to make sure the information on the Debtor File remains protected. Users are accountable for protecting and preserving the privacy of the individuals whose information is in the file.

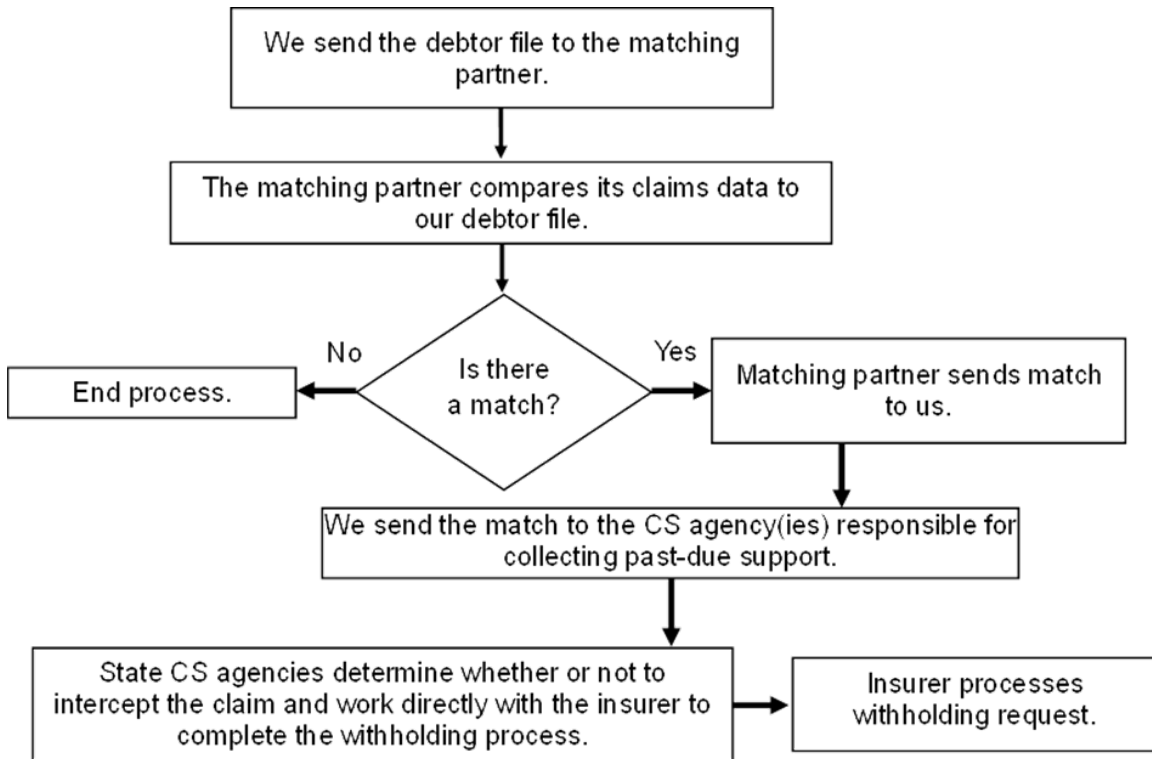

The matching partner's operational agreement has the following specific requirements:

- You maintain an audit trail of activities pertaining to the OCSE file and its contents until destroyed.
- Destroy electronic files promptly after conducting the data match, no more than two business days after OCSE sends the replacement Debtor file.
- Establish and maintain a security incident response capability. You must report all security or privacy incidents, or suspected incidents, involving the file to OCSE no later than one hour after discovery.
- Implement logical access controls that supply protection from unauthorized access, alteration, loss, or disclosure.
- Limit physical and logical access to the OCSE file and the information included within to authorized personnel only.

You return matches to us in the Standard Input Format (SIF), found in Appendix A.

Figure 5-2 shows the matching partner process flow. CS agencies send information to us about individuals who owe past-due support.

Figure 5-2: Matching Partner Process Flow

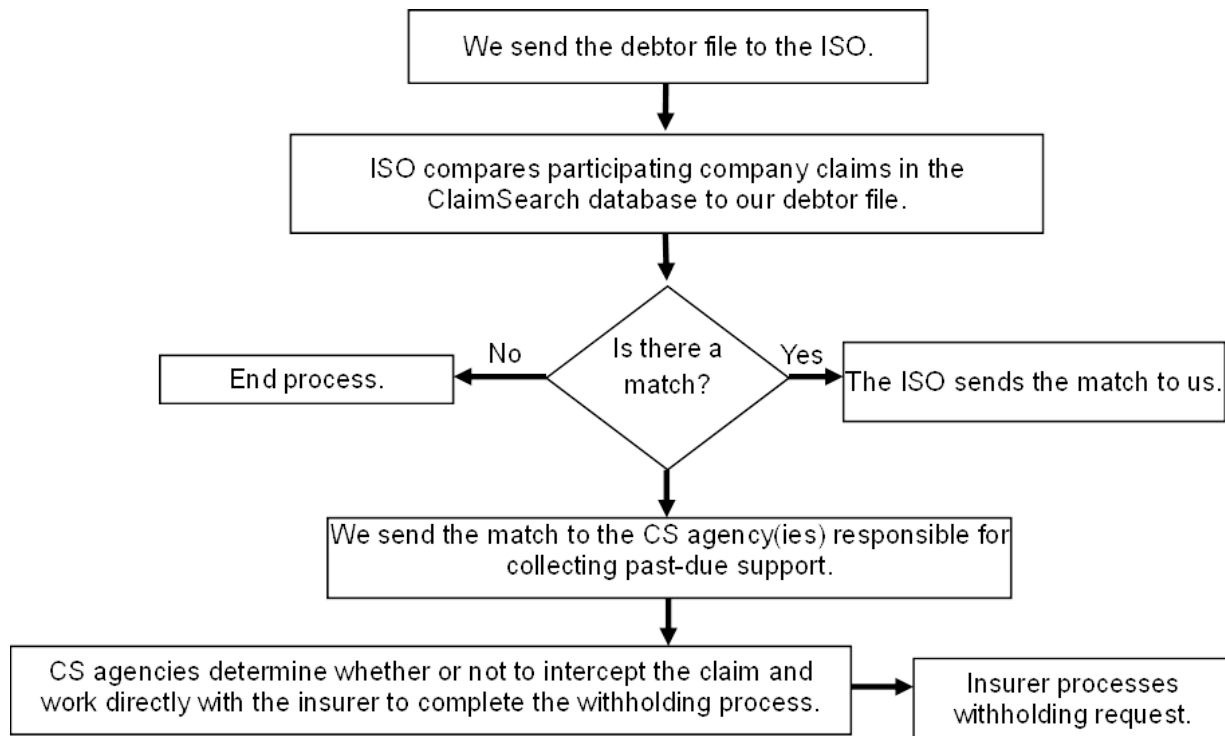

5.3 Participation Option Three – ISO

Property and casualty insurers can participate in our IM program if they report claims to the ISO ClaimSearch database. The ISO offers participation in the IM program free of charge.

We send our Debtor file to the ISO, which compares your claims to our debtors, and then returns the matches to us. We forward matches to the state agencies responsible for collecting child support.

Figure 5-3 shows the ISO process flow. CS agencies send information to us about individuals who owe past-due support.

Figure 5-3: ISO Process Flow

5.4 Participation Option Four – DIS

[DIS](#) is a web application on the Portal that allows you to send information about individuals eligible to receive a lump sum or other type of payout to determine whether they owe past-due support.

You can look up a single individual and receive an immediate response. You may also upload a file containing multiple individuals that we process within one hour. The system generates an email indicating the processing results.

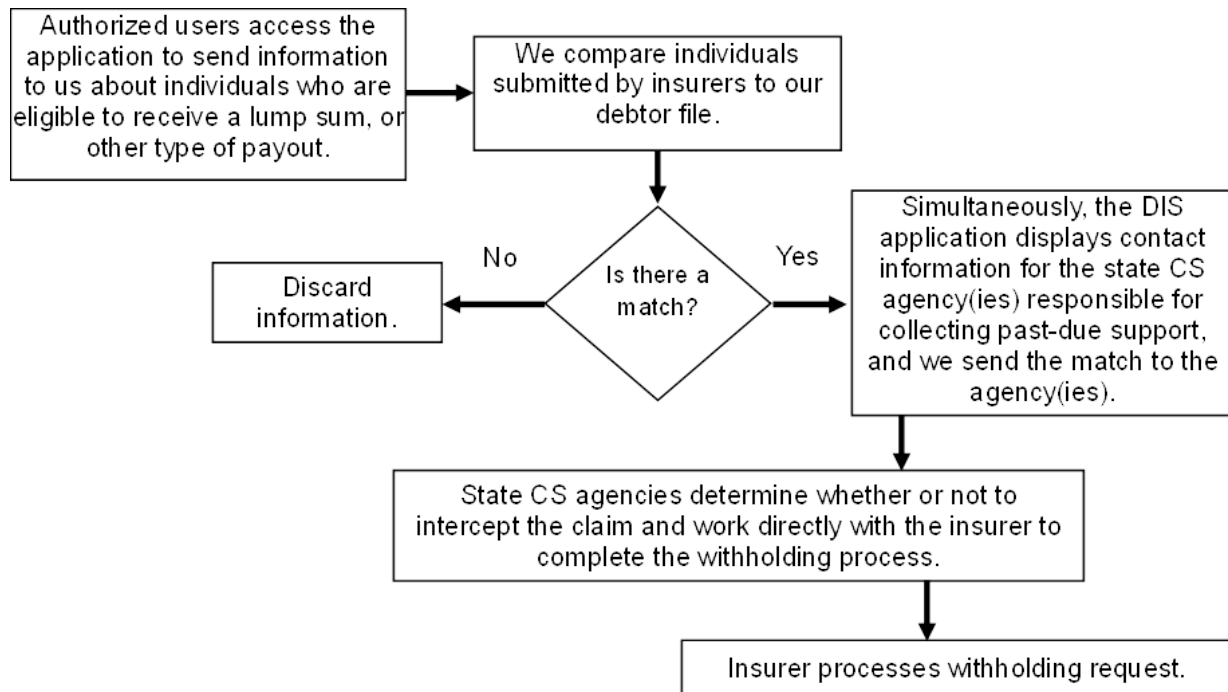

You must send all information at least five days before the payout date. This five-day window allows state agencies time to process matches they receive.

You may release the payment to the claimant or beneficiary after the payout date. However, if the state-mandated hold period for lump-sum payouts is beyond the payout date, you must hold the payment according to state law.

Specifications including the record layout for the DIS are located in the [Debt Inquiry Service System Interface Specifications](#).

Figure 5-4 shows the DIS process flow. CS agencies send information to us about individuals who owe past-due support.

Figure 5-4: DIS Process Flow

6 Transmission Methods

We support the following transmission methods.

- The [Portal](#) (for Participation Option One: Claims Submitter Only)
- Managed File Transfer (MFT)
 - TIBCO® MFT software required
 - Platform-to-platform exchange
 - Connectivity requirements are Internet with VPN tunnel and AES-256/SHA-2 encryption
- SFTP with VPN Requirement
 - The VPN requires that all phase 1 and phase 2 settings use AES256/SHA2
 - The pre-shared secrets will be exchanged over the phone
 - Pre-shared secrets should contain upper and lower case alpha, numeric, and symbolic characters and should be no less than 16 characters in length
 - We use public IP (non-RFC 1918) addresses within our VPN tunnel and require our external business partners to provide public IPs for use within the VPN tunnel
 - We will source all outbound SSH/SFTP traffic from a single IP address
 - Two additional IPs will be provided for inbound connections to our production and integration environments
 - Inbound connections within the VPN should use SSH/TCP Port 22
 - Outbound connections are normally configured to use SSH/TCP Port 22, but may be modified if required
 - Your SFTP software must be able to support Secure Shell (SSH) with key authentication

Note 1: The VPN implementation is a requirement. OCSE must use encryption at both the transport (via the VPN) and application (via SFTP) levels for the exchange. There are no exceptions.

Note 2: We do not support Pretty Good Privacy (PGP) encryption

- Your SFTP software must be able to act as both the SFTP server and client
- OCSE will act as the SFTP client for transmission of the OCSE inquiry file. No sites are permitted to “pull” or act as the SFTP client to receive the inbound (OCSE-to-external) file
- OCSE will dictate the outbound (external site-to-OCSE) filename

Contact Charlotte Hancock (charlotte.hancock@acf.hhs.gov) to schedule a teleconference with your network and SFTP host/server administrator.

- Network engineer: to discuss the VPN requirement
- SFTP host/server administrator: to discuss the SFTP directory structure, credentials share (SSH key exchange), and SFTP server/client environment
- Application contact: to discuss end-to-end application testing

7 File Layout

You can use the IM SIF layout shown in Appendix A to send claims information to us. The SIF is only required if you are a matching partner.

We support text (.txt) and comma-separated values (.csv) file formats.

The DIS file layout is available in the [Debt Inquiry Service System Interface Specifications](#).

8 Where to Get Help

If you have questions about specifications, email the IM Help Desk at insurancematch@acf.hhs.gov.

A OCSE Insurance Match Standard Input File Record

The IM SIF is a standard, fixed-format layout used for sending insurance claims data to us. This section explains the SIF record layout, including field definitions and required fields. Although all of the data elements are helpful to state child support agencies, most of the elements are not required. If the information is not available, you must fill the fields with spaces.

Chart A-1 includes the following information:

- Field Name** Identifies the name of the field.
- Location** Identifies the position of the field in the record.
- Length** Identifies the size of the field in bytes.
- A/N** Designates the type of field: alphabetic (A), numeric (N), or alphanumeric (A/N).
- Comments** Provides a description of the field, as well as valid values.

THE PAPERWORK REDUCTION ACT OF 1995 (Pub. L. 104-13): Public reporting burden for this collection of information is estimated to average 5 minutes per electronic response and 6 minutes per manual response for processing input and output files, including the time for reviewing instructions, gathering and maintaining the data needed, and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
