## GENERAL NOTES:

The MOE reports (Tables 2:5 through 2:6:2) are programmed to reflect adjustments in MOE activity that occurred in FY 2007 regardless of the year from which these activity changes occurred. Table 2:8 reflects only MOE activity in the current funding year (FY 2007). Therefore, numbers from Tables 2:5 through 2:6:2 may not coincide with those in this table.

This table shows total State TANF MOE expenditures through this period and the comparison of State MOE expenditures to meet the 75 and 80 percent annual MOE levels.

The MOE levels at 75 and 80 percent have been adjusted for States with Tribes operating TANF.

## GENERAL NOTES:

The MOE reports (Tables 2:5 through 2:6:2) are programmed to reflect adjustments in MOE activity that occurred in FY 2008 regardless of the year from which these activity changes occurred. Table 2:8 reflects only MOE activity in the current funding year (FY 2008). Therefore, numbers from Tables 2:5 through 2:6:2 may not coincide with those in this table.

This table shows total State TANF MOE expenditures through this period and the comparison of State MOE expenditures to meet the 75 and 80 percent annual MOE levels.

The MOE levels at 75 and 80 percent have been adjusted for States with Tribes operating TANF.

GENERAL NOTES:

The MOE reports (Tables 2:5 through 2:6:2) are programmed to reflect adjustments in MOE activity that occurred in FY 2009 regardless of the year from which these activity changes occurred. Table 2:8 reflects only MOE activity in the current funding year (FY 2009). Therefore, numbers from Tables 2:5 through 2:6:2 may not coincide with those in this table.

This table shows total State TANF MOE expenditures through this period and the comparison of State MOE expenditures to meet the 75 and 80 percent annual MOE levels.

The MOE levels at 75 and 80 percent have been adjusted for States with Tribes operating TANF.

1/ State has no two-parent families in its TANF or SSP-MOE program.

SSP-MOE cases, we have included them here to improve the comparison with the FY 2007 rates. Note that, even with this change, there are important differences between the two years due to statutory and regulatory changes in the families included in the rates and the countable work activities and hours.

1/ State has no two-parent families in its TANF or SSP-MOE program.

SSP-MOE cases, we have included them here to improve the comparison with the FY 2008 rates. Note that, even with this change, there are important differences between the two years due to statutory and regulatory changes in the families included in the rates and the countable work activities and hours.

##### Job Entry Rate

This is a measure of the percent of the number of unduplicated unemployed adult recipients who entered employment for the first time during the year (i.e., Job Entries). An adult is considered to have entered employment for the first time in a calendar quarter if he/she had no earnings in any of the prior quarters of the year.

$$\frac{\text{Sum of Job Entries in Quarters 1 through 4}}{\text{Unduplicated number of unemployed adult recipients in the year}} \times 100$$

##### Job Retention Rate

This is a measure of the percent of the sum of the unduplicated number of employed adult recipients in each quarter of the year who were also employed in the first and second subsequent quarters. (At some point, the adult might have become a former recipient.)

$$\frac{\text{Sum of employed adult recipients in each of Quarters 1 through 4 who continued employment in both the first and second subsequent Quarters}}{\text{Sum of unduplicated employed adult recipients in Quarters 1 through 4}} \times 100$$

##### Earnings Gain Rate

This is a measure of the rate of change in earnings of employed adult recipients who were employed in both an initial and the second subsequent quarter in each of the four quarters of the year.

$$\frac{\text{Sum of total dollars earned in second subsequent Quarter in each of Quarters 1 through 4 minus sum of total dollars earned in initial Quarter in each of Quarters 1 through 4 of adult recipients employed in both of these Quarters}}{\text{Sum of total dollars earned in initial quarter in each of Quarters 1 through 4}} \times 100$$

**Non-Work Measures**

*Food Stamp Rate*

This is a measure of the percent of low-income working households with children under 18 in the year (calendar year) who participate in the Food Stamp program. Basic calendar year data were provided by the Bureau of the Census. The formula for the calculation is as follows:

$$\frac{\text{Number of low-income working households with children under 18 participating in the Food Stamp program in the calendar year}}{\text{Total number of low-income working households with children under 18 in calendar year}} \times 100$$

*Family Formation and Stability Rate*

The formula for computing the rate is:

$$\frac{\text{Number of children who reside in married couple families}}{\text{Number of married couple families}} \times 100$$

The formula for computing the percentage point improvement rate is:

$$\text{Calendar year rate} \text{ minus the prior calendar year rate}$$

1/ Data provided by the U.S. Census Bureau. Only calendar year data are available. Rate is the number of low-income working households with children under 18 (i.e., in households with income less than 130% of poverty and earnings equal to at least half-time full-year Federal minimum wage) receiving food stamps as a percentage of the number of households (as defined here) in the State.

1/ Although the sample size used for federal reporting is adequate for program purposes, the subsamples used for the job entry, job retention, and earnings gain measures are not large enough to ensure comparability of FY 2008 data with FY 2007 data for some states that switched from universe data in one period to sample reporting in the other (or vice versa). As a result, these states have been excluded from the calculation of the national rates for FY 2008.

<sup>1</sup>Births to unmarried women per 1,000 unmarried women aged 15-44 years.

<sup>2</sup>Percent of all births to unmarried women.

NOTE: For most states, data on births to unmarried women are based on a direct question on the birth certificate or in the electronic birth registration process, asking if the mother is married. In 1999-2002, mother's marital status for two states was inferred from other information on the birth certificate. Rates for 1991-2001 have been revised and may differ from rates previously published.
