

wealthy people should not be allowed to traffic as they have been. also letting muslims in the usa with their habit of assaulting sexually young boys is not a good idea. they should not be able to get away with that in america or anywhere. we need to protect kids. far too much of this also goes on in central america and mexico.

all americans who engage in this should have to be tattooed on their body with the word sex attacker or some such thing. so they can be identified as having a history of this. some have suggested it should be on their face. this attack on young people is absolutely and totally wrong and we need to deal with it much more punitively.

this comment is for the public record. i don't mean 19 years old and 15 years old. i mean the 50 year old, 60 year old, the old men who do this seem to be legion.
