

Beyond the Finish Line: Planning for Sustainability

September 18, 2013 • 3:00 p.m. Eastern Time

U.S. Department of Health & Human Services (HHS)
Administration on Children, Youth and Families (ACYF)
Family and Youth Services Bureau (FYSB)
Adolescent Pregnancy Prevention Division

Today's Presenters

Advancing Science
Reducing Risk
Improving Lives

Stephanie Guinosso

Program Manager
ETR Associates

Jill Elnicki

Senior Program Specialist
ETR Associates

Learning Objectives

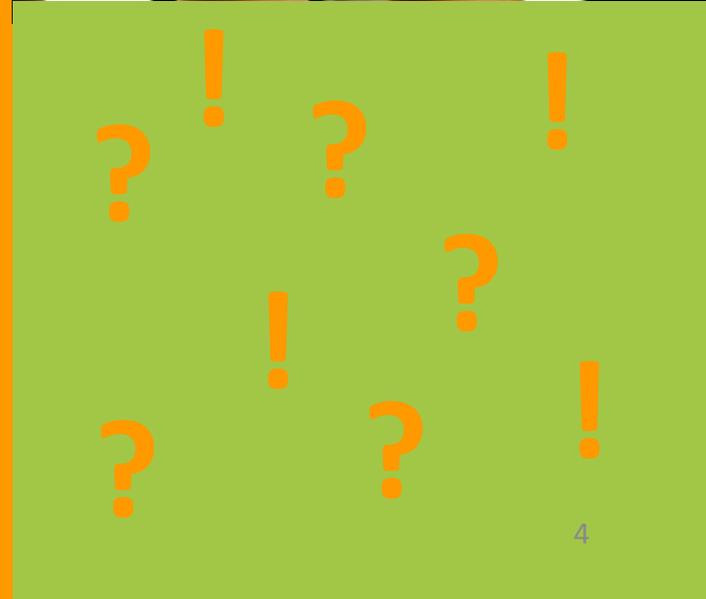

By the end of today's Webinar, participants will be able to:

1. Explain the concept of sustainability and why it is important
2. State the factors that promote project sustainability
3. Develop concrete strategies for increasing their project's sustainability

Ways to Participate

- Questions and Comments
 - Use question box tool
- Other Tools
 - Polls
 - Hand raising

Let's Take a Poll

What Is Sustainability?

Some Definitions of Sustainability

- The capacity of an organization to achieve long-term success and stability and to serve its clients and consumers without the threat of losing financial support or quality of services (Center for Substance Abuse Treatment, n.d.)
- The ability to continue services after a funding period is over and to ensure that the organization becomes a permanent part of community resources (Center for Substance Abuse Treatment, 2008)
- The institutionalization of a project as an integral part of an organization (Goodman et al., 1993)

Levels of Sustainability

Continuation

Institutionalization

Dissemination

(Sources: Savaya and Spiro, 2012; Scheirer, 2005, Wolff, 2010)

Why Is Sustainability Important?

- Ensures a need is met in the community
- Makes use of valuable investments
- Maintains trust

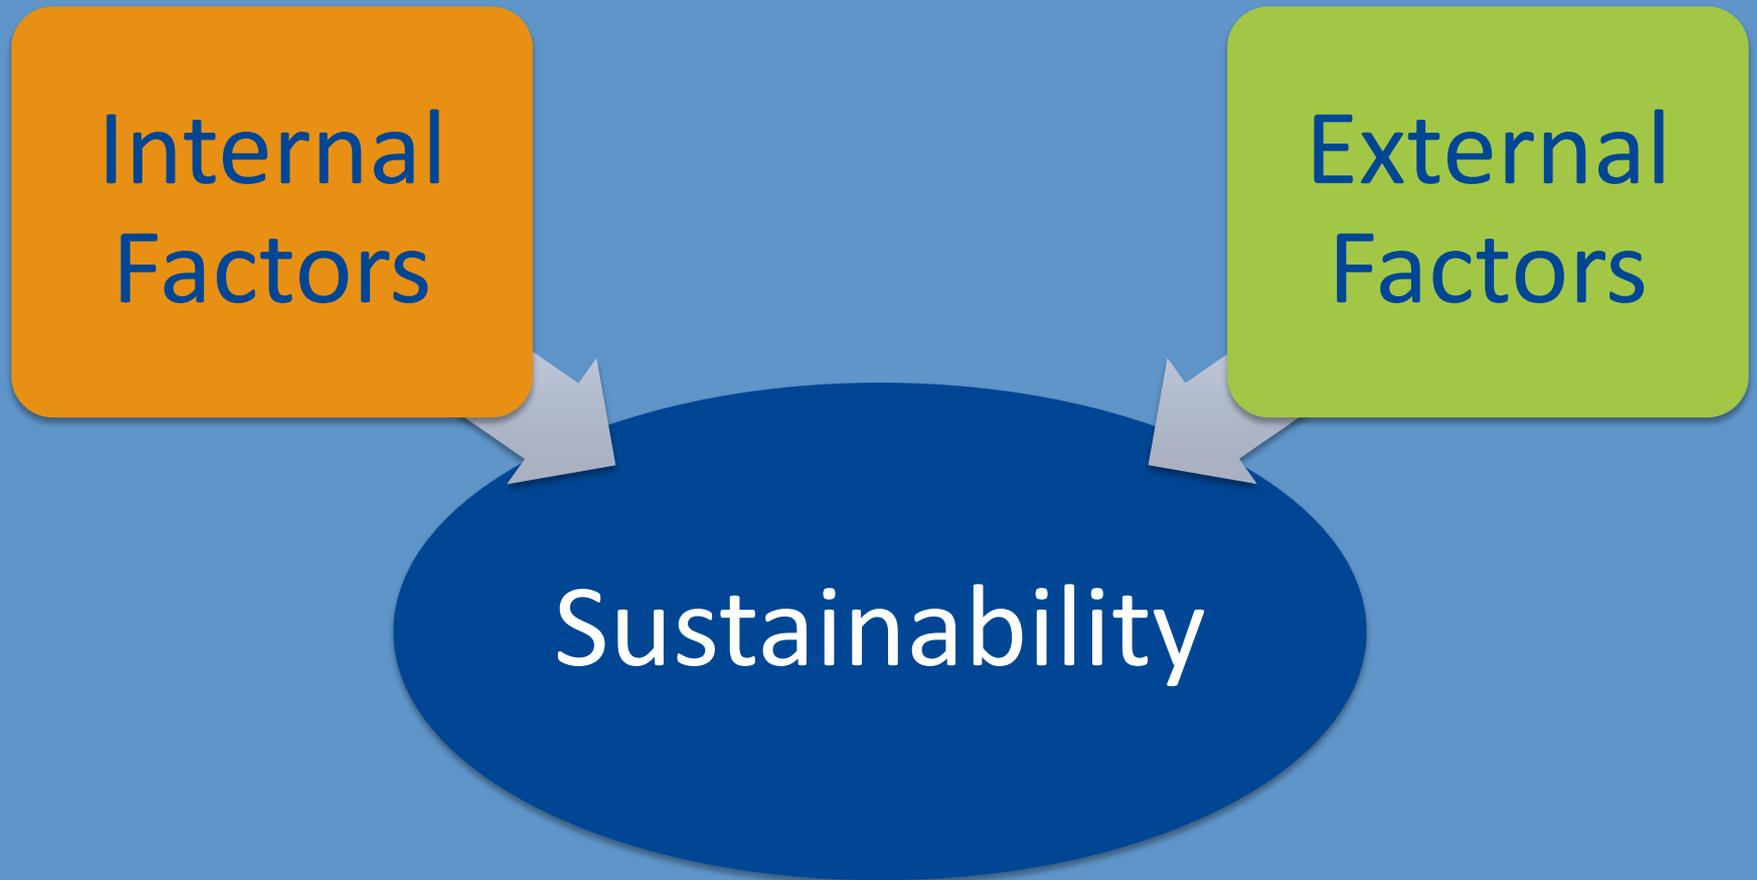

Let's Take a Poll

Sustainability Factors

Sustainability Factors

Internal Factors

- Clear vision and leadership
- Strong internal systems/organizational capacity
- Results orientation/program evaluation
- Adaptability
- Communications
- Strategic financing/diversified funding
- Sustainability plan

External Factors

- Political support
- Broad base of community support/partnerships
- Key champions

Pause for Questions

Planning Steps

Let's Take a Poll

Planning Steps

1. Assemble your team
2. Envision your future
3. Assess sustainability capacity
4. Prioritize what to sustain
5. Identify sustainability strategies
6. Develop an action plan
7. Implement the action plan
8. Evaluate your efforts

(Source: Washington University, 2013a)

Step 1: Assemble Your Team

Step 2: Envision Your Future

- Picture what the sustainable project would look like
- Determine your project's niche
- Involve project leaders and key stakeholders
- Engage a broad range of community partners
- Articulate the vision to other stakeholders

Step 3: Assess Sustainability Capacity

- Washington University Center for Public Health Systems Science

<https://sustaintool.org/>

- Center for Civic Partnerships

<http://www.civicpartnerships.org/docs/services/NHC-Sustainability.htm>

Step 4: Prioritize What to Sustain

Project Components	Maintain within Your Organization	Transfer to Another Organization	Discontinue	Undetermined
Train agencies on evidence-based programs	X			
Maintain a cadre of trainers	X			
Implement evidence-based programs		X		
Implement programs for foster parents	X	X		

(Sources: Hutchinson, n.d.; Washington University, 2013a) 22

Refer to Handout for Step 4

Step 4: Prioritize What to Sustain

List project components and then check the most appropriate box to the right to help determine which are most critical to sustain.

Project Components	Maintain within Your Organization	Transfer to Another Organization	Discontinue	Undetermined

Step 5: Identify Sustainability Strategies

Approach 1

- Which areas are the most urgent?
- Which areas result in the best payoff?
- Which areas require the fewest resources?
- Which areas are the most feasible?
- How would you prioritize the areas based on available time and resources?

Step 5: Identify Sustainability Strategies

Approach 2

Project Components	Resources		Strategies
List essential project activities	List specific resources needed to continue	List possible sources of resources	List possible strategies for securing resources
Train agencies on evidence-based programs	Space to host the training Materials (\$2,000) Food Trainer time/salary	Agencies with training space Make green Food donations Charge fee	Seek partnerships with in-kind donors Develop key champions to support fee for service Fundraising

Refer to Handout for Step 5

Step 5: Identify Sustainability Strategies

Use the following worksheet to identify sustainability strategies for the project components noted as critical to sustain in Step 4.

Project Components	Resources		Strategies
List essential project activities.	List specific resources needed to continue.	List possible sources of resources.	List possible strategies for securing resources.

Step 6: Develop an Action Plan

Sustainability Strategy: Seek partnerships with in-kind donors

Action Steps	Person Responsible	Timeline
Make a list of all resources needed that could come from in-kind donations	Youth interns	September 1, 2013
Make a list of all potential partners with in-kind resources to give who would be sympathetic to our cause	Marv	September 7, 2013
Develop a pitch that shares project vision as well as what partners may stand to gain	Zoa and Marv	September 14, 2013
Contact partners and make the ask	Zoa	October 1, 2013

Steps 7 & 8: Implement the Action Plan and Evaluate Your Efforts

Sustainability planning is ongoing:

- Monitor progress toward each step
- Discuss progress with stakeholders
- Reassess your sustainability capacity yearly

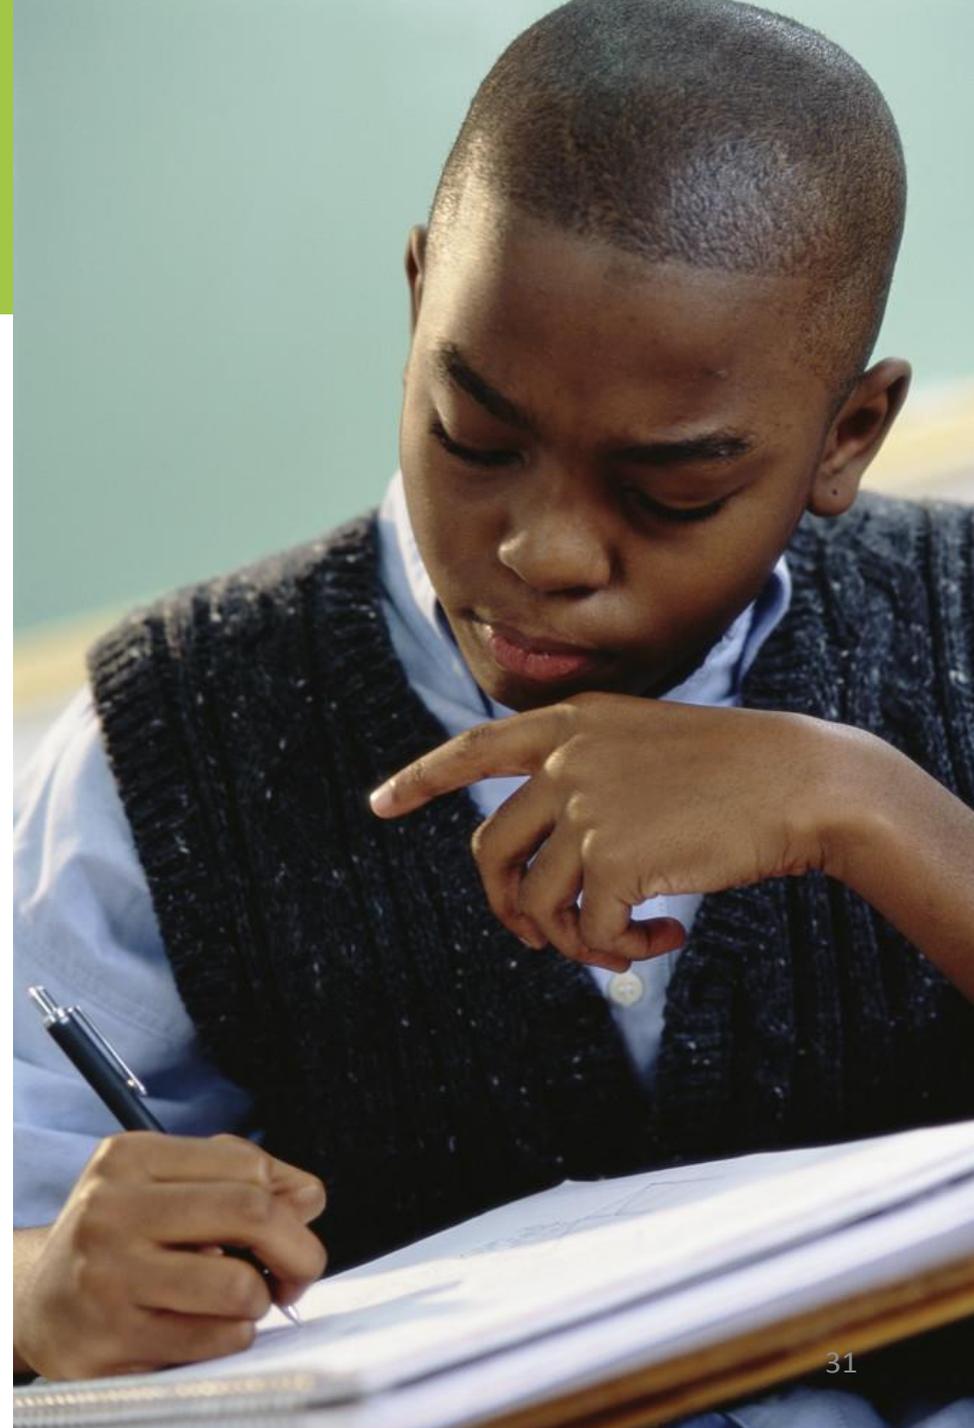

ANY
QUESTIONS
?

Sharing Sustainability Successes

Homework

1. Complete a sustainability assessment
2. Develop a sustainability plan

Further Assistance

- Request technical assistance via your FYSB Project Officer
- Visit the Communities of Practice Website
