

Mother and Infant Home Visiting Program Evaluation (MIHOPE)

Informing the Future of Home Visiting

MIHOPE Research Design MIHOPE, the evaluation of the federal Maternal, Infant, and Early Childhood Home Visiting (MIECHV) program, is unique in its scale and in the number of research methods it will use to understand home visiting. It includes an impact analysis, a multi-level implementation analysis, and an economic analysis.

How and Why We Use Random Assignment

Listen to MIHOPE team lead Sharon Rowser explain the study method and how random assignment allows the researchers to look at what difference the home visiting programs make.
